

DATASHEET Thermal Protector N02

Type series 02

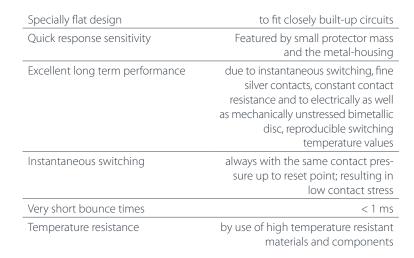

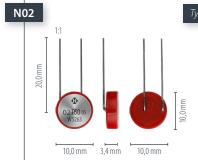

Construction and function

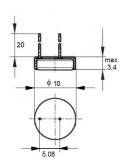

The switchgear of type series 02 is fixed in a positive lock and is self-aligning between the floor of a conductive housing (1) and a contact cap which is made of steel (2) and insulated from it, plus an integrated stationary silver contact (6) which closes the housing like a button cell. By means of a throw force a bimetallic disc (5) pushes the movable contact (4) that sticks out in the middle of it onto its circumferential collar (6) against the spring snap-in disc (3) that is also surrounding the contact (4). Due to the higher throw force of the bimetallic disc (5) the switch contact remains open against the mechanical resistance of the spring snap-in disc (3) before reaching the rated switching temperature. As such, the contact also remains open as long as the bimetallic disc - only reacting to the ambient temperature - continually works and its shape changes. The bimetallic disc (5) only snaps into its inverted position when the rated switching temperature is reached and the contact is closed by the abruptly released pressure of the spring snap-in disc (3). The spring snap-in disc (3) is now a transfer element for electric current and as such, it enables the bimetallic disc (5) to continue to work on a continuous basis. When the reset temperature is reached, the bimetallic disc snaps back into its start position and the contact is opened again.

Features:

Installation height h	from 3,4 mm
Diameter d	10,0 mm
Length of the	14 0 mm / 20 0 mm

connection pins

ype: Normally open; resets automatically; with a connection wire; partially in	isulated in a pla	stic cap	
Nominal switching temperature (NST) in 5 °C increments		70 °C - 200 °C	
Tolerance (standard)		±5 K	
Reverse switch temperature (RST) below NST (defined RST is possible at the customer's request)	VDE	≥ 35 °C	
Installation height		from 3,4 mm	
Diameter		10,0 mm	
Length of the connection pins		14,0 mm / 20,0 mm	
Resistance to impregnation *		suitable	
Suitable for installation in protection class		1	
Pressure resistance to the switch housing *		450 N	
Standard connection	Connectin	g wire with d = 0,5 mm	-
Available approvals (please state)	IE	C; ENEC; VDE; CSA; CQC	
Operating voltage range AC		up until 500 V	and a training
Rated voltage AC		250 V (VDE)	and a discontinuous
Rated current AC $\cos \varphi = 1.0/\text{cycles}$		2,5 A / 10.000	Acres of
Rated current AC $\cos \varphi = 0.6$ /cycles		1,6 A / 10.000	de de
Total bounce time		< 1 ms	
Contact resistance (according to MIL-STD. R5757)		≤ 50 mΩ	And Section
Vibration resistance at 10 60 Hz		100 m/s ²	A. A. Link Jane

More varieties of the type series 02:

- CO2 with connector cables; with or without epoxy; without insulation
- \$02 –with connector cables; with or without epoxy; insulation: Mylar®-Nomex®
- LO2 with connector cables; with epoxy; fully insulated in a screw on housing
- C02 Pin with pins; with epoxy; without insulation

Marking example:

 Trade mark
 thermik

 Type / version
 N02

 NST [°C]. Tolerance [K]
