

# DATASHEET Thermal Protector SF2

# Type series F2

## **Construction and function**

The switchgear of type series F2 is fixed in a positive lock and is self-aligning between the floor of a conductive housing (1) and a contact cap which is made of steel (2) and insulated from it, and which closes the housing like a button cell. By means of a throw force a bimetallic disc (5) pushes the movable contact (4) that sticks out in the middle of it onto its circumferential collar (6) against the spring snap-in disc (3) that is also surrounding the contact (4). Due to the higher throw force of the bimetallic disc (5) the switch contact remains open against the mechanical resistance of the spring snap-in disc (3) before reaching the rated switching temperature. As such, the contact also remains open as long as the bimetallic disc - only reacting to the ambient temperature - continually works and its shape changes. The bimetallic disc (5) only snaps into its inverted position when the rated switching temperature is reached and the contact is closed by the abruptly released pressure of the spring snap-in disc (3). The spring snap-in disc (3) is now a transfer element for electric current and as such, it enables the bimetallic disc (5) to continue to work on a continuous basis. When the reset temperature is reached, the bimetallic disc snaps back into its start position and the contact is opened again.

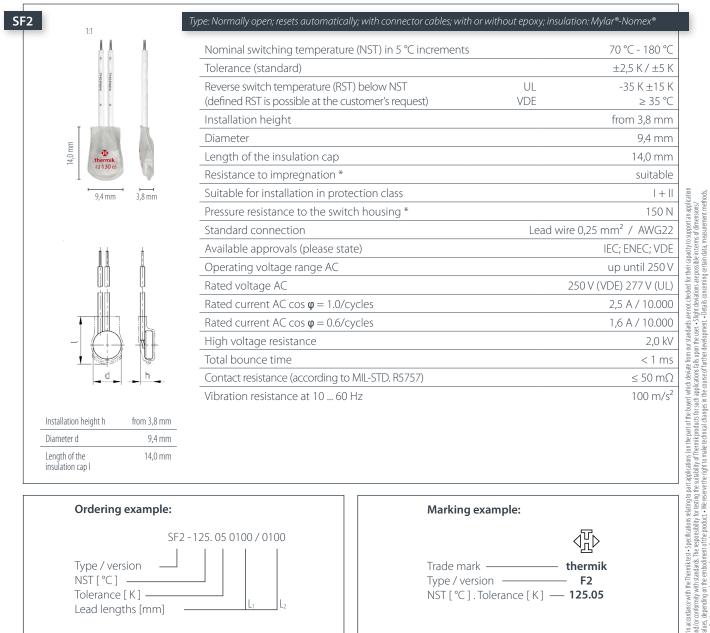

### Features:

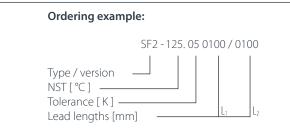

Specially flat design	to fit closely built-up circuits
Quick response sensitivity	Featured by small protector mass and the metal-housing
Excellent long term performance	due to instantaneous switching, fine silver contacts, constant contact resistance and to electrically as well as mechanically unstressed bimetallic disc, reproducible switching temperature values
Instantaneous switching	always with the same contact pres- sure up to reset point; resulting in low contact stress
Very short bounce times	< 1 ms
Temperature resistance	by use of high temperature resistant

materials and components

#### **Technical Data Type SF2**

The listed products are an extract from our standard range. Other versions and customised manufacturing are available upon request.

More varieties of the type series F2:

• CF2- with or without epoxy; without insulation

Marking example:

Trade mark thermik F2 Type / version -NST [ °C ] . Tolerance [ K ] — 125.05
